

Bellville is proud to be home of the only hospital in Austin County. Bellville Medical Center is a Level IV Trauma- and Level III Stroke-certified hospital, providing that level of service for Austin County and surrounding areas. Local intervention can mean the difference between life and death, a return to full function or permanent brain or cardiac damage.

The Emergency Department is staffed 24/7 with a physician, nurses, lab and imaging personnel. An affiliate of Houston's LifeFlight, Bellville Medical Center has a helipad to quickly transfer any patient requiring higher level care.

Bellville Medical Center has primary care practitioners in the adjacent space, as well as a full pharmacy and office space for specialists who rotate through to provide cardiology, pain management, urology, orthopedics, oncology, general surgery, ENT, podiatry. Outpatient surgery at the hospital is scheduled for local residents' convenience.

Patients have access to acute inpatient care, observation care, inpatient and outpatient physical therapy services as well as occupational therapy and speech therapy. The kitchen is under the watchful eye of Chef Jonny Averitt, where delicious meals are created.

Bellville Medical Center staff has the dedication, training, education and passion to serve the community with personal professionalism not available in large hospitals. Patients are people at Bellville Medical Center, not a number.
